

BOSO ERGON SORBENTS OIL ONLY (WHITE)

As the name already indicates, the products from the Boso ERGON Sorbents oil-only range are the ideal solution to absorb oil and oil-bearing liquids. Because it does not absorb water it is especially appropriate for separating oil-bearing liquids from water.

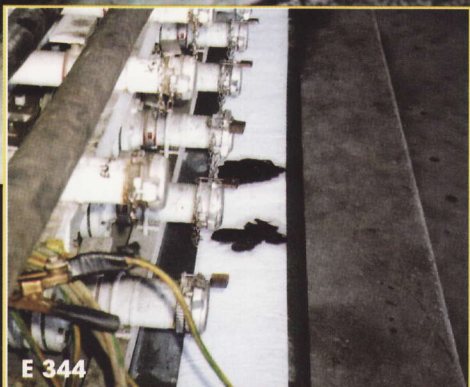

Mostly they are used on polluted water surfaces and for different naval applications. Besides this, they are used around or under, for example, machines and aggregates, which keeps the workshop

clean and safe. Our Boso ERGON Sorbents oil-only products absorb and retain up to 25 times their own weight in hydrocarbon-based liquids. Even when the absorbents are totally saturated, they keep their floating power.

The Boso ERGON Sorbents pads and rolls available in this range make a right solution possible. These Boso ERGON Sorbents oil-only pads and rolls excel in their high level of oil absorption.
