MATERIAL SPECIFICATION SHEET

DYSTOL HOSPITAL GRADE

DATE: 6 OCTOBER 2010
SPEC SHEET NO: TAMS 7590

DESCRIPTION

Dystol Hospital Grade is a strong general purpose disinfectant for use in hospital and domestic applications which meets the EN 1276 standard for bactericidal assay. It is an amber liquid with a characteristic chlorinated xylene/pine odour and is formulated from mixed chloroxylenols, pine oil, alcohol and vegetable oil soap. It mixes readily with water to form a translucent emulsion

Dystol Hospital Grade can be stored, undiluted, for a long period and is stable at temperatures ranging from 5°C to over 40°C.

TYPICAL PROPERTIES

Appearance	An amber coloured liquid
Bactericidal Assay	Passes EN 1276 at a dilution rate of 1:120
Chloroxylenol %	4.8
Density @ 20°C	0.95 – 1.03
pH	8 - 11

USES

For the disinfection of sink waste pipes and drains, use Dystol Hospital Grade undiluted and leave for 5 minutes before sluicing with water. For general disinfection dilute 6 ml in 1 litre of water. For heavy disinfection and general cleaning of medical rooms, dilute 10 ml in 1 litre of water. For cleaning walls, floors and general equipment, dilute 10 ml in 1 litre of water. Due to its strong odour, Dystol Hospital Grade is not recommended for use in areas where food is prepared and served.

HEALTH RISKS

Dystol Hospital Grade is irritating to the skin and eyes.

DYSTOL HOSPITAL GRADE

SAFETY PRECAUTIONS

Keep containers tightly closed, away from children and away from sources of heat.
Wash splashes from the eyes immediately.
Wash off any splashes on the skin immediately.
Wash hands after use.
Use in well ventilated areas.
Wash out containers thoroughly and dispose of safely.
Do not use in any areas where the tainting of food may occur.

FIRST AID AND MEDICAL ADVICE

PRODUCT IN EYE	Flood eyes with water or eyewash solution for at least 10 minutes. Seek medical attention if necessary.
PRODUCT ON SKIN	Remove all contaminated clothing immediately. Wash with plenty of soap and water. Seek medical attention if necessary.
PRODUCT INGESTED	Rinse mouth with water. Do not swallow. Do not induce vomiting. Seek medical attention.
PRODUCT INHALED	Remove to fresh air. Keep warm and at rest. Seek medical attention if necessary.
GENERAL	If patient feels unwell, seek medical advice and show label where possible.

TRANSPORT

Dystol Hospital Grade is not classified as hazardous for transport

CONTAINERS

200 litre drums, 200kg net, approx 220kg gross.
